

# SHWETKAMAL GAUD

Software Developer

gaudshwetkamal0438@gmail.com | +91 9662862725 | B-301 Shagun Antilia, Ahmedabad-382481

**Portfolio** | **HackerRank** | **Linkedin** | **GitHub** | **LeetCode**

## EDUCATION

**Silver Oak College of Engineering & Technology**

Computer Science and Engineering B.Tech

CGPA: 9.83

Gujarat, India

October 2020 - June 2024

## EXPERIENCE

**Medkart Pharmacy Pvt Ltd | Software Developer Intern** Ahmedabad, Gujarat, India | January 2024 - July 2024

- **Medkart Retail Excellence App:-** Developed a Loyalty Program and Referral Program that enhanced user engagement and increased products purchase at Medkart.
- **Store Point of Sale:-** Implemented Customer Master Module for viewing bills, address, prescriptions of authenticated user via OTP which increase the security of user's confidential data .
- **Admin Point of Sale:-** Developed User Management Module for adding users and assigning appropriate role to them that makes easier work for admin.
- **Medkart Ecommerce Admin:-** Developed a Custom Task Master that enables the admin to assign tasks to store personnel. This system assesses the store personnel's ability to manage the store efficiently by assigning them tasks that cover essential store operations.
- Collaborated with UI/UX designers to implement responsive and mobile friendly designs.

Libraries/Frameworks: React, React Native, Bootstrap, Redux, Next.js, SCSS, Spring Boot  
Tools / Platforms: Git, GitHub, VS Code, Android Studio, npm, GCP  
Databases: MongoDB

## PROJECTS / OPEN-SOURCE

**Multifactor-Authentication** | **Link** *TypeScript, JavaScript, React Native, Java, Spring Boot*

- The primary aim of Multifactor Authentication app is to enhance security by requiring users to provide multiple forms of verification to prove their identity.
- By requiring more than one factors, this feature significantly reduce the risk of unauthorized access, even if one factor is compromised. This makes system or data more secure against cyber attacks.

**virtualclassroom** | **Link** *JavaScript, TypeScript, Java, Spring Boot React, Redux, Saga, CSS, HTML*

- I am currently working on this project and aim of this project is to create an interactive online learning environment that facilitates the creation and sharing of educational content.

**Portfolio** | **Link** *TypeScript, JavaScript, React, Redux, Next JS, CSS, HTML, Bootstrap,*

- This Portfolio website display completed projects, case studies and professional achievements in a structured way.
- This highlight my technical expertise in software development, including proficiency in front-end frameworks like React, Next Js, Bootstrap.

## CERTIFICATIONS

- Python Basics - **HackerRank**
